

***I have a plan to Make New Britain a
Smarter More Efficient Community by
putting hidden revenues to work!***

SMART City Initiative

Objective: To make New Britain's government more efficient through effective use of existing resources

Energy Efficiency and Reliability

- Uncover hidden revenues through smart energy management and conservation measures
- Upgrade mechanical, HVAC, Lighting and building management systems
- Combine energy purchasing for City and BOE to maximize rate savings
- Utility savings could yield as much as 20% savings allowing the city to fund upgrades with existing revenues
- Utilize Smart Grid technology and Smart Power meter installations

Facilities Management and Security

- Making buildings smarter through daily monitoring of utilities
- Integration of all City and BOE's building management systems through software integration
- Utilize video surveillance capability making streets and schools safer
- Engage access control technology in all city owned buildings especially schools

Finance

- Decaying revenues allow for large savings through real consolidations of City and BOE functions
- Maintenance, Finance, Personnel cooperation will create more efficient administration of your tax dollars
- Reduced costs will allow for future funding of books and technology
- Utilize existing GIS and GPS technologies to assist in storm management and emergency decisions
- Retrofitting of Street lighting systems to LED technology will save \$\$
- Revenue generation through surplus enterprise funds
